

Job Search & Career Fit Report

Prepared for: Anushka Bajpai | Kanpur, Uttar Pradesh | Target: Software Developer / Java Developer / Backend Developer (Fresher)

Profile Snapshot

Education	MCA, AKTU University (2024-2026, expected); BCA, CSJM University (2021-2024)
Experience Level	Fresher / Entry-Level
Core Skills	Java, Python, C, HTML, CSS, JavaScript, PHP, MySQL, Git, OOP, DBMS, OS
Key Projects	MediGenie (Healthcare AI Chatbot, NLP); Restaurant Website (HTML/CSS/JS/PHP/MySQL)
Certifications	AWS Cloud Computing, Employability Skills, Soft Skills Training, Infosys Skill Up
Target Locations	Bengaluru, Hyderabad, Pune, Noida, Gurugram, Kanpur, Lucknow, Remote (India)
Salary Expectation	INR 4 LPA - 8 LPA

Top Matching Opportunities

Company	Role	Location	Posted	Match Score	Why It Fits	CTC	Apply
Sarathi Softech	Jr. Java Developer	Pune	Feb 26, 2026	9/10	Direct match to Java Developer target; junior/fresher level; core Java is your strongest skill	N/A	Apply
Karabi Software	Java Developer Trainee	Bengaluru	May 13, 2026	9/10	Explicit Trainee/Fresher role with Java focus and training component, matching mentorship preference	N/A	Apply
Go4worldbusiness.com	Junior Software Developer (Java Full Stack)	Delhi	Feb 19, 2026	8/10	Java + full stack matches skillset and Full Stack Developer (Entry Level) target	N/A	Apply
Sakshi Softech Pvt Ltd	Java Developer / C# Developer	Pune	May 21, 2026	7/10	Java-based role at a fresher-friendly IT services company	N/A	Apply
SpireHub Softwares	PHP Developer (Fresher)	Noida	Jun 01, 2026	7/10	PHP matches Restaurant Website project skills; explicitly fresher	N/A	Apply
Anohim	Full Stack Developer Intern	Delhi	Jun 02, 2026	7/10	Full stack + fresher; good for gaining experience even at intern level	N/A	Apply
Fusionpact Career	Full-Stack Developer Intern (Python & React)	Noida	Mar 06, 2026	6/10	Python matches skillset; React/full-stack aligns with target but is a skill gap	N/A	Apply
Countless Services Pvt Ltd	Java Developer	Pune	May 22, 2026	6/10	Java Developer title match; company seniority profile unclear	N/A	Apply
Digitap.AI Enterprise Solutions	Software Engineer	Bengaluru	Mar 05, 2026	6/10	Product-based AI company aligns with MediGenie project and AI interest	N/A	Apply
NextGen Infotech (GE Healthcare)	Software Engineer	Bengaluru	May 25, 2026	5/10	Software Engineer title match, though healthcare/enterprise context may expect more experience	N/A	Apply

Excluded: Digital Marketing Intern (Pune), Automation QA Fresher (Noida), Fresher Web Designer (Delhi), Flutter/Android-only Developer roles, .Net/Sr. Java roles requiring prior experience — these do not match the Java/backend/full-stack focus or fresher-level requirement.

Most Commonly Required Skills Across Listings

- Java (core requirement across most matches)
- Full Stack development (Java + frontend frameworks)
- PHP
- MySQL / database management
- Python
- HTML, CSS, JavaScript
- Git / version control
- Spring / Spring Boot (commonly expected even at fresher level)

Skill Gap Analysis

Current Skill	Market Demand	Gap / Recommendation
Core Java, OOP	High	Add Spring Boot / Spring MVC - almost universally expected for Java Developer roles even at entry level
MySQL	High	Solid foundation - extend with JDBC / Hibernate to connect Java apps to databases
HTML, CSS, JS, PHP	Medium	Strong for full-stack/PHP roles; add React or Angular for Full Stack Developer titles at product companies
Python	Medium	Underutilized in current projects - consider a project that demonstrates it
Git	High	Good - ensure GitHub profile is public, active, and linked on resume
Cloud (AWS certificate)	High	Certification alone is a weak signal - build and deploy a small project on AWS to demonstrate it
REST APIs	Universally expected (not currently listed)	Significant gap - learn to build and consume REST APIs in Java or PHP

Market Demand Insights

- Java Developer / Java Full Stack roles dominate fresher openings in Pune, Bengaluru, and Noida/Delhi - the strongest area of alignment.
- Trainee and Intern postings are common entry points and often convert to full-time roles - worth targeting alongside direct full-time applications.
- PHP fresher roles remain available (especially in Noida) due to legacy systems in IT services companies - a useful backup track given the Restaurant Website project.
- Product-based AI companies (e.g. Digitap.AI) value NLP/chatbot project experience - MediGenie is a genuine differentiator here.
- Pure frontend (Flutter, Android, Angular-only) and QA roles are common but do not match the stated backend/full-stack focus, and were excluded.

Recommendations to Improve Interview Chances

- Add Spring Boot to the skillset - even a basic CRUD REST API project would significantly increase Java Developer match rates.
- Deploy MediGenie or the Restaurant Website on AWS - converts the AWS certificate from a paper credential into a demonstrated skill.
- Build a public GitHub portfolio and link it prominently on the resume and LinkedIn - recruiters at IT services firms (Sarathi, Sakshi, Karabi) check this.
- Target Trainee and Intern postings actively - Karabi Software's Java Developer Trainee role is close to ideal given the profile and training preference.
- Tailor the resume per application - emphasize Java for Java roles, PHP/MySQL for PHP roles, rather than using one generic version.

- Apply directly via company career pages in addition to Indeed - many fresher roles at IT services companies fill via referrals or walk-ins not always reflected on job boards.

Overall Fit Assessment

Target roles (Java Developer, Software Developer, Junior Full Stack Developer, Trainee programs):

Good fit. Core Java, OOP, MySQL, and web development foundations align well with entry-level requirements. The main gap is framework knowledge (Spring Boot) and REST APIs, both learnable within a few weeks and likely to meaningfully improve candidacy strength.

Compensation goals (INR 4-8 LPA):

Realistic for fresher roles. IT services companies (Karabi, Sarathi, Sakshi) typically offer in the INR 3-5 LPA range; product-based companies (Digitap.AI) and larger MNCs may reach INR 5-8 LPA but are more competitive and tend to expect stronger project portfolios or DSA skills.

Bottom line:

Well-positioned for IT services and trainee roles immediately. To access the higher end of the salary range (INR 6-8 LPA) and product-based companies, prioritize Spring Boot, REST APIs, and a deployed project within the next 1-2 months before applying intensively.
